 - December 18, 2019 closeout cost projections due
 - January 22, 2020 continuation information released

HI-V PROGRAM OVERVIEW

- Hi-V Program Goal
 - To improve access to and use of quality, client-centered services for individuals living in the DC EMA most affected by the HIV epidemic.

HI-V PROGRAM OVERVIEW

- Hi-V Program Objectives
 - Increase timely access to HIV-related care and treatment
 - Increase engagement and retention in HIV care
 - Increase viral suppression among persons living with HIV

HI-V PROGRAM OVERVIEW

- **Hi-V Program Participant Eligibility:**
 - Residents of the Washington, DC EMA that represent your selected focus population(s)
 - Be HIV positive and/or have behaviors that put them at risk for HIV
 - Have an annual gross income no greater than 500% of the Federal Poverty Guideline.

HI-V PROGRAM OVERVIEW

Focus Populations *include but are not limited to:*

- Gay, bisexual, same gender loving, MSM (all races & ethnicities)
- Black/African American women & men
- Latino men and women
- People who use drugs
- Youth aged 13 to 24 years
- Transgender women and men

HI-V PROGRAM OVERVIEW

Regional Early Intervention Services:

Client-centered services that promote equity, whole person health, and eliminate barriers (e.g. employment, housing, and behavioral health) to accessing/engaging in prevention and/or treatment services.

HI-V PROGRAM OVERVIEW

Status Neutral Approach:

Prioritizes the engagement of both people living with HIV and persons with risk behavior for HIV through a status-neutral approach. Focuses on activities that meet the needs of your chosen populations overall, rather than dividing services into either HIV prevention or HIV care.

HI-V PROGRAM OVERVIEW

The “*Hi-V*”(high-five) pillars that promote equity, eliminate barriers, and improve whole-person health for clients:

- “Find’em”
- “Teach’em”
- “Test’em”
- “Link’em
- “Keep’em”

HI-V PROGRAM OVERVIEW

Hi-V (high-five) Pillar 1:

“Find’em”

- Identify individuals from the focus population unaware of their status

HI-V PROGRAM OVERVIEW

Hi-V (high-five) Pillar 2:

“Teach’em”

- Educate individuals from the focus population about HIV, STI, Hepatitis C virus, risk reduction strategies, health literacy, healthcare access, and U=U. All proposed programs must integrate U=U into their clinical and non-clinical services and communication with individuals

HI-V PROGRAM OVERVIEW

Hi-V (high-five) Pillar 3:

“Test’em”

- Test individuals from the focus population for HIV, STIs, and hepatitis C, and initiate drug therapy as appropriate

HI-V PROGRAM OVERVIEW

Hi-V (high-five) Pillar 4:

“Link’em”

- Link individuals from the focus population to quality culturally competent services as needed

HI-V PROGRAM OVERVIEW

Hi-V (high-five) Pillar 5:

“Keep’em”

- Retain individuals from the focus population through active engagement in individualized services designed to eliminate barriers and promote optimal outcomes for overall wellness

HI-V PROGRAM OVERVIEW

Rapid Treatment Initiation:

- Start HIV anti-retroviral therapy (ART) on the same day as HIV diagnosis – no later than 7 days.
- Initiate Pre-Exposure Prophylaxis (PrEP) same day or within 7 days, as appropriate, or Post-Exposure Prophylaxis (PEP)

HI-V PROGRAM OVERVIEW

Comprehensive Harm & Risk Reduction:

Harm Reduction: policies, programs and practices that aim to minimize negative health, social and legal impacts associated with risk behaviors w/o requiring client to stop risk behaviors.

Risk Reduction: client-centered techniques to help persons at risk for HIV transmission identify their personal risk behaviors and develop and implement plans for reducing or eliminating those risks.

HI-V PROGRAM OVERVIEW

Additional Program Expectations:

- All outreach strategies & program activities specific to chosen focus populations
- Branding and/or marketing strategies
- Use of technology to promote or provide Hi-V Program

Questions?

HAHSTARFAS@dc.gov

Thank you. Good luck!
